AKISA Divine

Software Developer | Full-Stack Developer | AI Enthusiast

Kigali, Rwanda • akisadivine11@gmail.com • https://github.com/DIVINEakisa • https://www.linkedin.com/in/divine-akisa-b18802399

PROFESSIONAL SUMMARY

Motivated Software Developer and Information Technology student passionate about building accessible, AI-powered digital solutions that solve real-world problems. Experienced in full-stack web development using React, TypeScript, Node.js, NestJS, and modern database technologies.

Interested in Artificial Intelligence and Generative AI, with a focus on creating human-centered software solutions that improve healthcare accessibility, mental wellness, and everyday digital experiences. Skilled in Agile development, Git workflows, API development, teamwork, and problem-solving with a strong passion for continuous learning and innovation.

EDUCATION

Rwanda Polytechnic – Kigali College of Technology (RP-Kigali College)

Advanced Diploma in Information Technology

2024 – Present

Relevant Focus Areas:

- Software Engineering
- Web Application Development
- Backend Systems Development
- Database Management
- Artificial Intelligence Concepts
- Software Design and Development Practices

TECHNICAL SKILLS

Programming Languages

- JavaScript (ES6+)
- TypeScript
- HTML5
- CSS3
- PHP

Frontend Development

- React.js
- Vite
- Tailwind CSS
- Responsive UI/UX Design
- Component-Based Architecture

Backend Development

- Node.js
- NestJS
- Express.js
- RESTful APIs
- Backend Application Architecture
- Authentication and API Integration

Databases

- MongoDB
- PostgreSQL
- MySQL

Tools & Technologies

- Git & GitHub
- Docker
- Postman
- VS Code
- npm
- Agile Development Workflow

Artificial Intelligence & Emerging Technologies

- Generative AI Concepts
- Prompt Engineering
- Conversational AI Design
- AI-Powered Application Development
- Accessibility-Focused Technology Solutions

PROJECTS

Mama Guide – Pregnancy Support Platform

A digital pregnancy support platform designed to provide accessible guidance and information throughout the pregnancy journey.

Key Contributions:

- Designed a platform that helps users track pregnancy progress and access relevant information based on pregnancy stages.
- Developed features for health reminders, pregnancy education, and personalized guidance.
- Explored AI-powered assistance to simplify complex health information and improve accessibility.
- Focused on creating a user-friendly experience for better access to pregnancy support resources.

Technologies: React.js, NestJS, Node.js, MongoDB, Tailwind CSS, Generative AI Concepts

Amina AI – Mental Wellness Companion

An AI-powered mental wellness companion concept designed to provide supportive conversations for people who need someone to talk to during moments of loneliness, sadness, stress, or emotional challenges.

Key Contributions:

- Designed conversational experiences focused on empathy, encouragement, and emotional support.
- Explored the use of Generative AI for creating accessible mental wellness interactions.
- Designed AI-driven conversations that promote reflection and positive engagement.
- Focused on building technology that reduces loneliness and improves access to emotional support.

Technologies: React.js, TypeScript, NestJS, Node.js, Generative AI Concepts, Tailwind CSS

Car Sharing Platform

A web platform that enables users to discover, book, and manage shared vehicles.

Key Contributions:

- Developed responsive user interfaces for browsing available vehicles and managing bookings.
- Implemented authentication flows and integrated frontend applications with REST APIs.
- Built reusable React components and improved user experience through responsive design.
- Collaborated with developers using Git workflows, feature branches, and code reviews.

Technologies: React.js, TypeScript, Tailwind CSS, REST APIs, Git & GitHub

EXPERIENCE & TRAINING

TheGym Rwanda – Software Engineering Program

Software Engineering Trainee

- Developed practical software solutions through collaborative, project-based learning.
- Built applications using JavaScript, React, Node.js, NestJS, REST APIs, and software development best practices.
- Practiced Agile methodologies, Git workflows, feature branching, and collaborative coding.
- Participated in code reviews, debugging sessions, and technical discussions to improve software quality.
- Worked with team members to analyze challenges and deliver effective solutions.

SOFT SKILLS

- Problem-Solving
- Team Collaboration
- Technical Communication
- Creativity and Innovation
- Adaptability
- Critical Thinking
- Continuous Learning
- User-Centered Thinking

LANGUAGES

- English
- Kinyarwanda

INTERESTS

- Artificial Intelligence
- Generative AI
- Software Engineering
- Healthcare Technology
- Mental Wellness Technology
- Accessibility Solutions
- Open Source Development
- Building Technology Solutions with Social Impact
